- **Touro University, UNLV, US Insulation, MP Materials** MSHA/ OSHA Respirator Fit Testing. We provide respirators, medical clearance, fit testing: healthcare, construction, mining and manufacturing.
- **City of Henderson**- OSHA Confined Spaces
- **DR Horton, DHI, James Construction**- OSHA Construction Safety compliance site audits

We are Family  **Work Safe**  **For Life**

About Us

Best in the West Safety provides MSHA/OSHA regulatory compliance guidance and training to identify solutions for workplace safety and environmental problems. Diane Hale, the owner has created a team of safety, industrial hygiene and environmental professionals that are passionate about protecting worker's health and safety, and the environment. Our team conducts OSHA safety and hazardous materials compliance inspections. We observe and advise clients to identify work site hazards and determine which safety practices to implement to save time and money for the business to preserve the health and safety of workers.

Our diverse team supports and practices our core values of worker safety, family, integrity, diversity, and quality with all of our clients. We work every day to safeguard your worker's health and safety, while reducing your business's risk and liabilities associated with OSHA and EPA compliance.

Industrial Hygiene & Safety Core Competencies

- Respiratory Protection Fit Testing/Training
- Noise Exposure Surveys and Risk Assessments
- Indoor Air Quality Ventilation Surveys for Air Flow
- Audiometric On-site Testing Services
- Industrial Hygiene Services to Safeguard Workers
- OSHA Safety and EPA Compliance Audits
- MSHA New Miner and Refresher Safety Training
- Environmental, Hazardous Materials Management
- SPCC Written Plans for Oil Storage
- HAZCOM 1910.1200 & HAZWOPER 1910.120

Differentiators

- 3 Decades of providing safety, environmental, industrial hygiene and hazardous materials risk mitigation
- Our clients receive confidentiality, reliability, and responsiveness when time is critical for their projects
- Our team are OSHA/MSHA authorized instructors
- **SBA Legacy Small Business Award 2026**
- **NSC Superior Safety Performance 30 Years 2026**
- **Certified NV Green Business -Innovator 2025**
- **MGM Mentorship Diverse Businesses Program 2024**
- **NCA Diverse Professional Firm Award 2023**

Capabilities Statement

Respirators

When workers are exposed to toxic chemicals, silica and/or asbestos they need respiratory protection!

ONE STOP SHOP

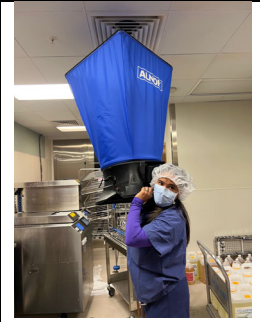

We provide respirators in-house and will conduct the medical screening, training and fit testing at our facility or at your place of business. Written Respiratory Protection Programs are available. When you need it done correctly and right now we are your best solution.

Air Quality Issues?

Need to analyze what is in your air ducts or have a toxic chemical issue. No problem we conduct air monitoring to determine their concentrations.

We have equipment to collect air samples to measure toxics concentrations in the air. We can measure air flow rates to determine if you are meeting air quality standards. Identifying the problems will save you money on energy and keep employees healthy with a constant supply of clean air.

Do your employees work in a hazardous chemical location? Find out if your facility still has positive air or negative air flow to remove the toxic chemicals.

Fire Department Permits

We provide chemical inventory audits and combustible dust documentation for Clark County Fire Permits. Not certain where to start? Call us and we will take the inventory, write the permit and submit it and best of all you will meet your compliance obligations.

Authorized MSHA & OSHA Trainers

When you have mining, construction or general industry workers that need safety training, we have the instructors.

Certified NV Green Business 2025

Phase I Environmental Site Assessment

Need to know your environmental liability for a new building or land? We can help.

Noise Exposure Monitoring

Have loud equipment or are your employees showing hearing loss? We will measure your dangerous noise levels and monitor the employees' 8-hour exposure to noise to ensure that they are not being subjected to hazardous noise levels. Preserve their hearing and become compliant with OSHA standards and reduce your liability.

Protect your workers hearing with Ear Plug Fit Testing.

We also write hearing conservation programs and conduct worker training.

We measure and document workplace noise levels.

Audiometric Testing

We provide customized hearing conservation programs and are available for Audiometric Hearing Testing at your Facility.

Looking for professional hearing conservation specialists in noise and safety training experience?

Our trainers are industry professionals with CAOCH certifications that demonstrate their expertise!

English and Spanish Speakers

2023 NCA Diverse Supplier & Professional Firm Award

Facility Safety Site Audits

When was the last time you had an independent third-party safety and risk audit completed?

We will perform an audit on your facility and identify the OSHA compliance items and corrective action areas that need improvement and list the appropriate OSHA regulations.

Legionella Water Testing

Our Industrial Hygiene services include water sampling to identify harmful levels of legionella and other pathogens that may harm your workers and clients. Every report includes mitigation measures and best practices to prevent growth in water lines.

MSHA Safety

Our business works with contractors and mining companies to provide safety support with MSHA New Miner and Refresher Training. Industrial Hygiene Services include:

1. Audiometric testing,
2. Noise exposure monitoring,
3. Respiratory protection training and fit testing,
4. Ear protectors fit testing,
5. Silica and toxic chemical monitoring
